Profile

I'm a highly motivated developer with a passion for learning and developing software. I have experience working directly with clients and achieving great project outcomes. I enjoy working in a team but I can also work independently to deliver good results. I'm interested in contributing my knowledge and skills to a company and helping the company meet and surpass its goals.

Work Experience

SOFTWARE DEVELOPER, CLEARCABLE NETWORKS; HAMILTON, ONTARIO – 2018-PRESENT

- Development of integrated frontend and backend interfaces.
- Development of Restful microservices with Python and Flask framework.
- Conduct quality assurance testing against software and identify software bugs, document and take corrective action where applicable.
- Provide ongoing support and maintenance of software solutions deployed at client sites including software updates, new application development, and support.
- Provide training to clients in the use of software and applications.
- Participate in a rotating after hours support schedule.
